

How To Create A Number Port Request Ticket

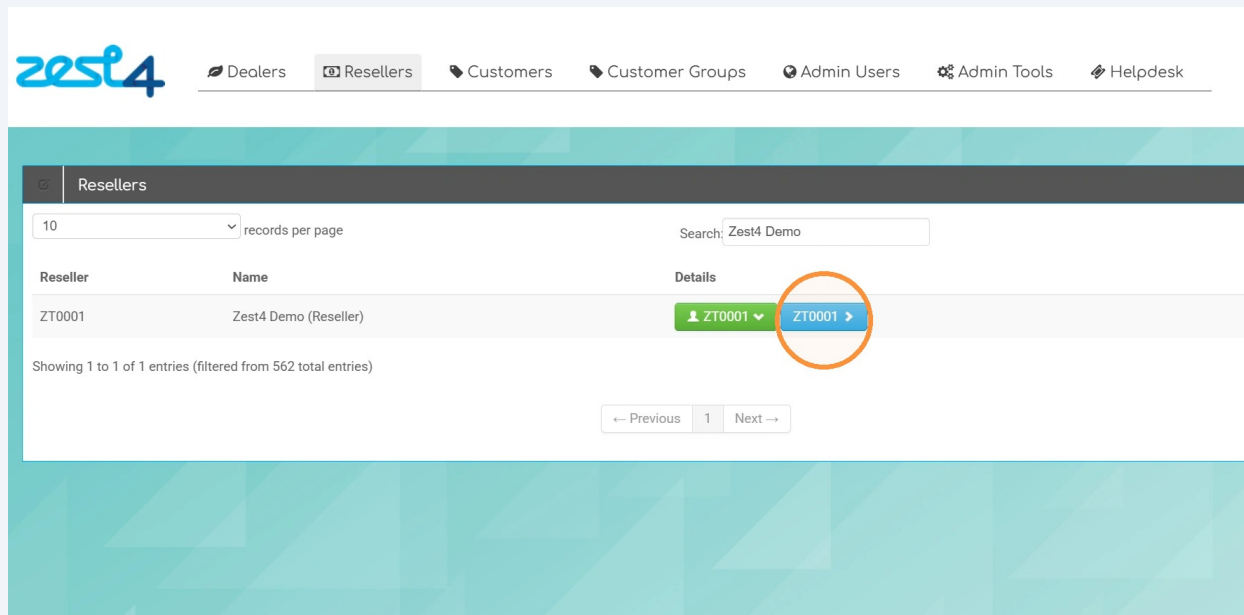

Learn the efficient process for submitting a number porting request through the Zest4 admin portal. This guide walks you through navigating the support tools and ensuring all necessary documentation is attached correctly.

Reseller Access

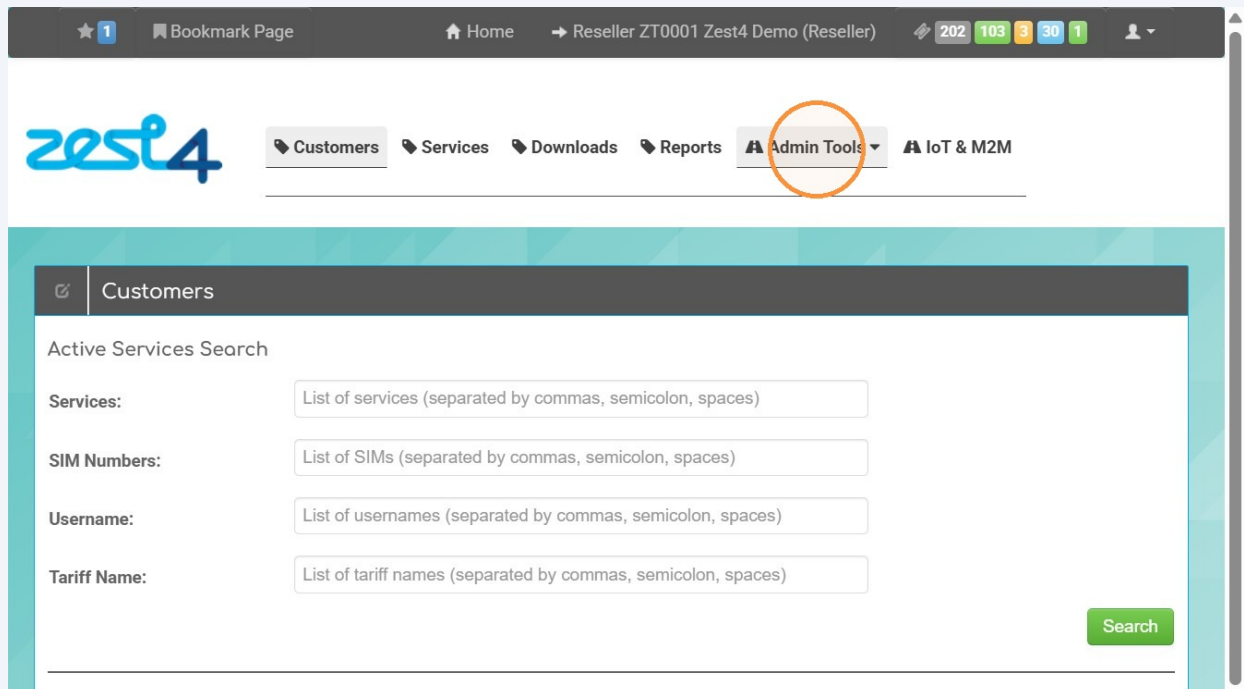

- 1 Navigate to <https://www.zest4customers.com>

2 Click the blue button next to your Reseller Company Name

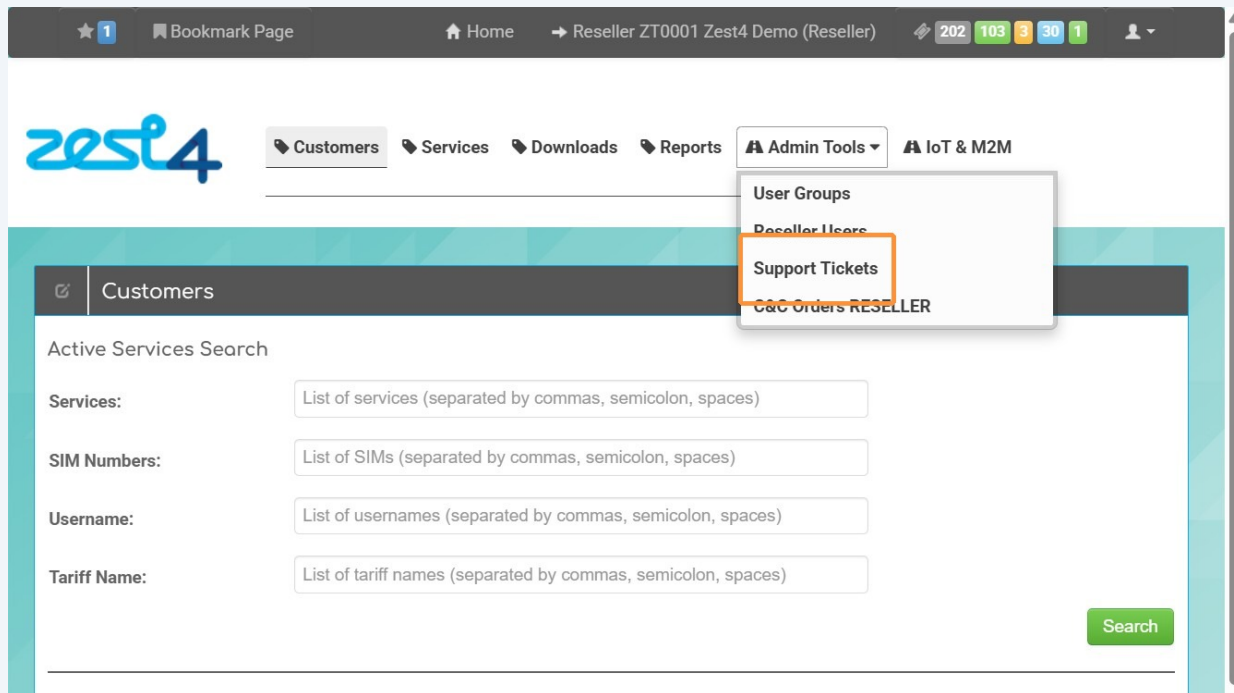

3 Then go to "Admin Tools"

Open Support Tickets

4 Select "Support Tickets"

The screenshot shows the Zest4 Admin Tools dropdown menu. The 'Support Tickets' option is highlighted with an orange box. The menu also includes 'User Groups', 'Reseller Users', and 'C&C Orders RESELLER'. The background shows the 'Customers' section with search filters for Services, SIM Numbers, Username, and Tariff Name.

Helpdesk Support Tickets

Look in the list below for the type of support ticket you wish to raise. Then download the file(s) associated with the ticket (if any) and fill them in. Once you are ready, click on the "Use This" button and fill in the associated form, including uploading the Files(s) you filled in. Once happy, click the "Create Support Ticket" to create your ticket.

Search:

Name

3rd Party Authority	To gain 3rd Party Access to a customer's account, you can use the attached letter template and send this to a customer. This letter must be printed, signed and dated by the authorised customer account holder. The completed letter will need to be uploaded on this support ticket and submitted to Zest4 for authorisation.	☒ Use This
Account Password Set Up / Amendment	Use this ticket if you would like to.... set up / find out / amend your account password.	☒ Use This

6

Depending on whether this is for 8x8, Horizon or CallSwitch, select "Use This" next to the relevant option

Helpdesk Support Tickets

Look in the list below for the type of support ticket you wish to raise. Then download the file(s) associated with the ticket (if any) and fill them in. Once you are ready, click on the "Use This" button and fill in the associated form, including uploading the Files(s) you filled in. Once happy, click the "Create Support Ticket" to create your ticket.

Search: C&C Number Port

Name		
C&C 8x8 Number Port Request	Please upload a completed port order authorisation form.	☒ Use This
C&C CallSwitch One Number Port Request	Please confirm within the ticket notes the address that the number(s) is registered to at network level. This may not necessarily be the customers current address or billing address so it is best to check this with the current provider before submitting. Once the port request has been submitted to the losing supplier, you will receive an update with a link where proof of ownership for the porting number(s) is to be provided. Please note that the port request cannot progress without this being completed. Please state within the ticket notes if the number(s) you wish to port are registered as Single or Multiline. If this information is missing, we will submit as single line orders. Port rejections incur a fee. Current pricing available on the latest Zest4 Tariff Guide.	☒ Use This
C&C Horizon Number Port Request	Please upload a completed port order authorisation form.	☒ Use This

Complete Ticket Form

7

You can then note the Customer Company Name that the port is being raised against

File(s): [Customer Letter of Authority.pdf](#)

On Behalf Of: N/A

Contact Type: N/A

Subcategory: N/A

Subject: Subject

Description: Description

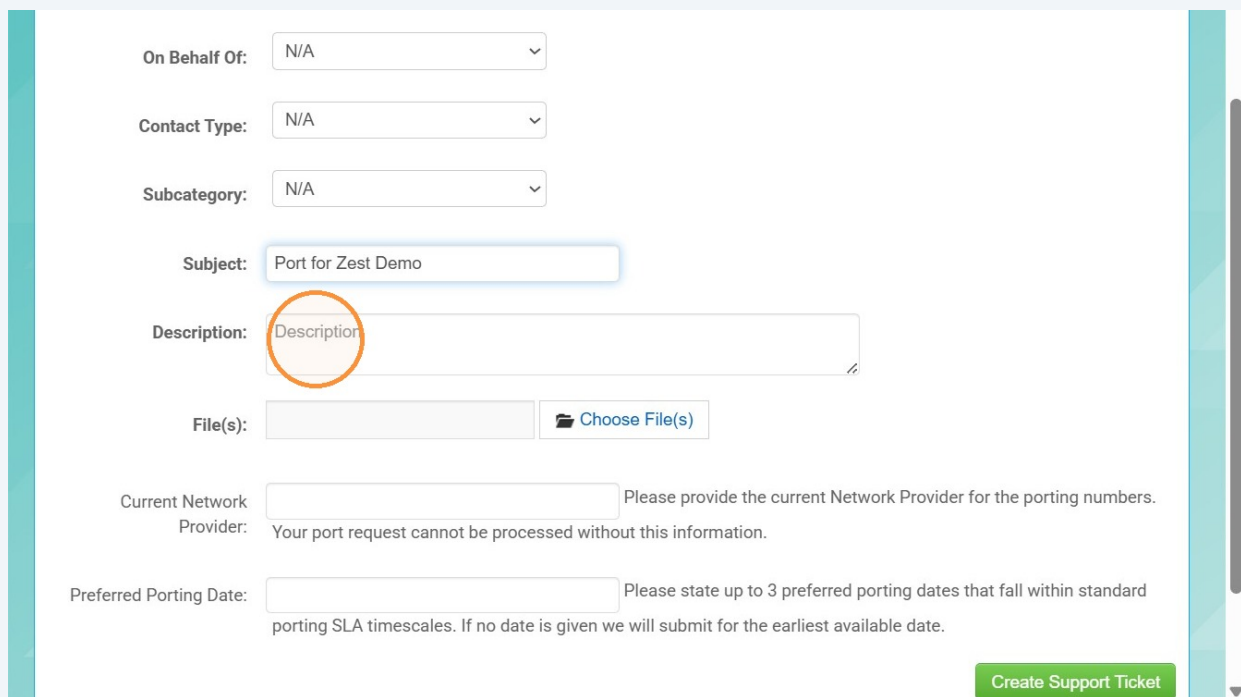

File(s): [Choose File\(s\)](#)

Current Network Provider: Please provide the current Network Provider for the porting numbers. Your port request cannot be processed without this information.

Preferred Porting Date: Please state up to 3 preferred porting dates that fall within standard

8

Here you can add any information in regards to the port and any special requirements, such as if you need the porting number(s) to be assigned to any of the existing numbers on the account, so that when this completes the numbers will be swapped seamlessly.
